Parent is physically active with child, often and very often % 2023-2024	29.5
--	------

Reports someone they live with smokes cigarettes % 2023-2024	13.3
--	------

Parent ate at a fast-food place with child 3 times or more, last week % 2023-2024	4.1
---	-----

Engages in leisure reading % 2023-2024	90.7
--	------

Parent lifestyle

Eats vegetables or fruits 5 or more times per day % 2023-2024	45.4
---	------

Eats highly processed foods 1 time or none per day % 2023-2024	46.0
--	------

Drinks sugary drinks % 2023-2024	47.7
------------------------------------	------

Province
New Brunswick

Eats the evening meal with child, daily % 2023-2024	62.2
Eats the evening meal with child, most days % 2023-2024	84.8
Eats breakfast daily % 2023-2024	62.7
Daily moderate or vigorous physical activity % 2023-2024	72.2
Has more than 2 hours of screen time, most days, except working hours % 2023-2024	13.6
Engages in leisure activities % 2023-2024	86.7

About this Table

Content and description

This table presents data collected from parents/guardians of students in kindergarten to grade 5 through the New Brunswick Student Wellness and Education Survey (SWES).

Why it's important

Only when we understand who our students are and what their needs are can we better plan for services and allocate resources to meet their health and educational needs.

Availability of the data

Due to the very low response rate for the parent/guardian questionnaire, some schools will not receive their K to 5 results due to the extremely low number of parents/guardians who responded. While schools will be able to compare their results in this data table to their school district, school sector and overall New Brunswick, these results will not be available on the NBHC web site for the 2023-2024 edition of this survey.

Due to this very low response rate, survey results are deemed to be not representative of the overall student and parent/guardian population. Therefore, results at the school, district, sector, and provincial levels are not to be used for planning or comparing to previous editions of the survey.

More information is available on our [New Brunswick Student and Education Wellness Survey](#) page.

Note about demographic groups:

In 2023, the NBHC undertook a review of the demographic questions in its surveys to more accurately report on the experience of citizens who identify with particular groups. As such, starting in 2024, all demographic groups (characteristics) have been adjusted to reflect this change. Data tables and indicator pages were adjusted to allow for trending where applicable.
