About

This indicator is the percentage of acute care patients who reported that they were completely informed about what was going to happen during the admission process [when admission is through ER].

Source

Hospital Acute Care Survey

Calculations

This indicator is based on respondents who have an admission through ER. This indicator is calculated by dividing the number of respondents who answered "completely" by the number of respondents who answered "not at all, partly, quite a bit or completely" to the question: Were you given enough information about what was going to happen during your admission to the hospital?

Unit	Interpretation	NBHC code
%	Higher is better	AC_ADM05_1
