## About

This indicator is the percentage of acute care patients who reported that the hospital staff always described possible side effects of their new medication in a way they could understand.

## Source

Hospital Acute Care Survey

## Calculations

This indicator is based on respondents who have received a new medication. This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, sometimes, usually or always" to the question: Before giving you any new medicine, how often did hospital staff describe possible side effects in a way you could understand?
