About

This indicator is the percentage of acute care patients who reported that when they left the hospital, they had a completely better understanding of their condition than when they entered the hospital.

Source

Hospital Acute Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "completely" by the number of respondents who answered "not at all, partly, quite a bit or completely" to the question: When you left the hospital, did you have a better understanding of your condition than when you entered?

| Unit | Interpretation | NBHC code |
|------|------------------|------------|
