About

This indicator is the percentage of acute care patients who reported that their pain was always well controlled.

Source

Hospital Acute Care Survey

Calculations

This indicator is based on respondents who needed medicine for pain. This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, sometimes, usually or always" to the question: During this hospital stay, how often was your pain well controlled?

Unit	Interpretation	NBHC code
%	Higher is better	AC_PCT02_1
