Racialized groups	34.6	n/a

About

This indicator is the percentage of citizens who reported that their primary care provider always spent enough time with them in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner and who consulted with them in the last 12 months. This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, rarely, sometimes, usually or always" to the question: Thinking of the last 12 months, in general how often did your family doctor or your nurse practitioner spend enough time with you?

Unit	Interpretation	NBHC code
