About

This indicator is the percentage of citizens without a primary care provider who used an after-hours clinic or a walk-in clinic in the last 12 months and said that the services they received completely met their needs.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who do not have a family doctor or a nurse practitioner and needed medical care in the last 12 months and visited an after-hours clinic or walk-in clinic. This indicator is calculated by dividing the number of respondents who answered "yes, completely" by the number of respondents who answered "no, yes, partially or yes, completely" to the question: Did the services you received at the after-hours clinic or walk-in clinic meet your needs?
