### **About**

This indicator is the percentage of citizens without a primary care provider who used an after-hours clinic or a walk-in clinic in the last 12 months and said that the services they received completely met their needs.

### Source

Primary Health Survey and Primary Care Survey

## **Calculations**

This indicator is based on respondents who do not have a family doctor or a nurse practitioner and needed medical care in the last 12 months and visited an after-hours clinic or walk-in clinic. This indicator is calculated by dividing the number of respondents who answered "yes, completely" by the number of respondents who answered "no, yes, partially or yes, completely" to the question: Did the services you received at the after-hours clinic or walk-in clinic meet your needs?
