About

This indicator is the percentage of citizens without a primary care provider who used one or more health care services the last time they needed health care in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who do not have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes to at least 1 of the 7 health care services asked in the questionnaire" by the number of respondents who answered "yes or no, to at least 1 of the options asked" to the question: In the last 12 months, thinking of the last time you needed medical care, did you use any of the following services: hospital emergency department, after-hours clinic or a walk-in clinic, consultation using NB Health Link, virtual clinic using eVisitNB, Tele-Care 811, consultation with a pharmacist or other, please specify
