### About

This indicator is the percentage of citizens who reported that their last consultation with their primary care provider was for a regular checkup that was scheduled in advance.

### Source

Primary Health Survey and Primary Care Survey

### Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner and who consulted with them in the last 12 months. This indicator is calculated by dividing the number of respondents who answered "a regular check-up that was scheduled in advance" by the number of respondents who answered "prescription renewal, a regular check-up that was scheduled in advance or a health concern or problem that needed medical care" to the question: Thinking of the last time you consulted with your family doctor or your nurse practitioner, either in-person or virtually, was this for:
