About

This indicator is the percentage of citizens who reported that their last consultation with their primary care provider was for a health concern or problem that needed medical care.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner and who consulted with them in the last 12 months. This indicator is calculated by dividing the number of respondents who answered "a health concern or problem that needed medical care" by the number of respondents who answered "prescription renewal, a regular check-up that was scheduled in advance or a health concern or problem that needed medical care" to the question: Thinking of the last time you consulted with your family doctor or your nurse practitioner, either in-person or virtually, was this for:
