\$60,000 or more	89.0	n/a
<b>Racialized groups</b>		
Racialized groups	87.5	n/a

## About

This indicator is the percentage of citizens who reported that they consulted with their primary care provider in the last 12 months.

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, did you consult with your family doctor or your nurse practitioner either in-person or virtually? A virtual care consultation includes telephone, video, email, or text messaging.
