With disability	91.7

About

This indicator is the percentage of citizens who consulted with their primary care provider in-person or virtually in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, did you consult with your family doctor or your nurse practitioner either in-person or virtually? A virtual care consultation includes telephone, video, email, or text messaging.
