Racialized groups	87.5	n/a

About

This indicator is the percentage of citizens who reported that they consulted with their primary care provider in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, did you consult with your family doctor or your nurse practitioner either in-person or virtually? A virtual care consultation includes telephone, video, email, or text messaging.
