	<b>Province</b> New Brunswick
Satisfaction with services received, somewhat or very satisfied %   2023	<b>80.4</b>
Other services %   2023	<b>16.4</b>

## About this Table

### **Content and description**

Data on self-reported information regarding the use and experience with health care services of New Brunswickers who do not have a permanent primary care provider (neither a family doctor nor a nurse practitioner). Topics include registration to NB Health Link as well as the use of primary health care services and experience with the services received.

### **Why it is important**

The results from the Primary Care Survey allows the NBHC to inform citizens and health system stakeholders about the quality of primary health care services from citizens' perspectives. This information can be used to make future improvements to primary health care in the province.

### **Availability of the data**

The information for this data table is available at different geographical levels as well as by demographic groups. More information is available on our [Primary Care Survey](#)

### **Note about demographic groups**

In 2023, the NBHC undertook a review of the demographic questions in its surveys to more accurately report on the experience of citizens who identify with particular groups. As such, starting in 2024, all demographic groups (characteristics) have been adjusted to reflect this change. Data tables and indicator pages were adjusted to allow for trending where applicable.
