Services received met their needs, completely % 2022	37.3
Other services % 2022	15.2
Services received met their needs, completely % 2022	42.1

About this Table

Content and description

Data on self-reported information regarding the use and experience with health care services of New Brunswickers who do not have a primary care provider (neither a family doctor nor a nurse practitioner). Topics include the use of primary health care services and experience with the services received.

Why it is important

The results from the Primary Care Survey allows the NBHC to inform citizens and health system stakeholders about the quality of primary health care services from citizens' perspectives. This information can be used to make future improvements to primary health care in the province.

Availability of the data

The information for this data table is available at different geographical levels as well as by demographic groups. More information is available on our [Primary Care Survey](#) page.
