Another service % 2022	6.1	5.0
Allied health professional % 2022	S	1.9

	Zone 6 Bathurst and Acadian Peninsula Area	Province New Brunswick
Specialist % 2022	2.2	1.5

Barriers accessing care

Has trouble finding their way around the health care system % 2022	19.7	21.7
--	-------------	-------------

Chronic health conditions and management

One (1) or more chronic health conditions % 2022	71.6	67.5
Very confident in managing their health condition % 2022	41.0	33.1

About this Table

Content and description

Data on self-reported information regarding the accessibility and experiences in using health care services. Topics include attachment and accessibility to a primary care provider within 5 days, use of other health care services because the primary care provider is not available as well as barriers to health care services and management of chronic health conditions

Why it is important

The results from the Primary Care Survey allows the NBHC to inform citizens and health system stakeholders about the quality of primary health care services from citizens' perspectives. This information can be used to make future improvements to primary health care in the province.

Availability of the data

The information for this data table is available at different geographical levels as well as by demographic groups. More information is available on our [Primary Care Survey](#) page.
