**About**

This indicator measures the percentage of all surgeries that have been completed within their assigned target timeframe. It is calculated by adding all procedures completed within the assigned timeframe divided by the total number of surgeries completed. Data is based on a 3-month reporting period and refers to the place of service (where the surgery is performed). Data is reported quarterly.

**Source**

Surgical Access Registry

**Notes**

Wait times are calculated from the date that the patient and surgeon determine that the patient needs surgery and the patient is ready to receive it and ends on the date when the surgery is performed. This indicator does not include emergency surgeries. Timeframes during which the patient was not available to have surgery are excluded from the wait time calculations. Source data is from the Provincial Surgical Access Registry
