Calculations

This indicator is based on respondents who have been bullied. This indicator is calculated by dividing the number of respondents who answered "please specify" by the number of respondents who answered at least one of the following "before school, during classes, between classes, during recess or lunch, during extra-curricular activities (for example, sports, clubs), after school or please specify" to the question: If you were bullied, including online bullying, when did it happen most often ?

Notes

This indicator is based on a survey question for students in New Brunswick's Anglophone schools. Survey results are only available for the Anglophone sector and Anglophone school districts.
