About

This indicator is the percentage of average number of hours and minutes of sleep of students in grades 6 to 12 when there is school the next morning. This indicator is based on the Canadian 24 Hour Movement Guidelines for Children and Youth.

Source

Student Wellness and Education Survey - Grades 6-12

Calculations

The first step is to calculate the 'usual number of hours slept' for each student. The number of hours slept is calculated by subtracting the time of going to bed from the time of getting up, as self-reported by the students to the following two questions: At what time do you usually go to sleep when you have school the next morning? And when do you usually wake up on school mornings? This indicator is calculated by dividing the 'sum of all respondent number of hours slept' by the 'total number of respondents' who answered these two questions about sleep.

Notes

Users are advised to exercise caution if comparing data from the community of Grand Bay-Westfield, Westfield, Greenwich Area to other New Brunswick communities. The data for the community of Grand Bay-Westfield, Westfield, Greenwich Area is based on students in grades 6 to 8, while data from the other communities are based on students in grades 6 to 12. Survey results are assigned to communities based on the location of the school. The community of Grand Bay-Westfield, Westfield, Greenwich Area does not have any schools with grades 9 to 12.
