About

This indicator is the percentage of citizens with a preference for French who reported that they always received services in their preferred official language during their interactions with a specialist in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have a preference for French when receiving health services and who had a consultation with a specialist in the last 12 months. This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, sometimes, usually or always" to the question: During your interaction(s) with the specialist, how often did you receive the services in the language you preferred?
