About

This indicator is the percentage of citizens who reported that they had a consultation with a pharmacist in the last 12 months because their primary care provider was not available.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Thinking of the last 12 months, did you use any of the following services because your family doctor or your nurse practitioner was not available? e) Consultation with a pharmacist

Unit	Interpretation	NBHC code
%	Lower is better	PC_NAVPY_1
