### About

This indicator is the percentage of citizens who reported that they used an after-hours or a walk-in clinic in the last 12 months because their primary care provider was not available.

### Source

Primary Health Survey and Primary Care Survey

### Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Thinking of the last 12 months, did you use any of the following services because your family doctor or your nurse practitioner was not available? b) After-hours clinic or walk-in clinic

---

Unit	Interpretation	NBHC code
