About

This indicator is the percentage of citizens without a primary care provider who used one or more health care services when they needed health care in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who do not have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "yes to at least 1 of the 8 health care services asked in the questionnaire" by the number of respondents who answered "yes or no, to at least 1 of the options asked" to the question: Thinking of the last 12 months, did you use any of the following services when you needed medical care: hospital emergency department, after-hours clinic or a walk-in clinic, virtual clinic using eVisitNB, Tele-Care 811, consultation with a pharmacist, consultation with a specialist, consultation with an allied health professional (e.g. audiologist, psychologist, dietitian, occupational therapist, physiotherapist, social worker...) or other services
