## About

This indicator is the percentage of citizens who reported that it was somewhat or very easy to get care from their primary care provider during the evening or on weekends.

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is based on respondents who have a family doctor or a nurse practitioner. This indicator is calculated by dividing the number of respondents who answered "somewhat easy or very easy" by the number of respondents who answered "service not offered outside clinic hours, very difficult, somewhat difficult, somewhat easy or very easy" to the question: How do you rate your ability to get care from your family doctor or nurse practitioner during the evening (after 5 pm) or on weekends when you need medical care? Would you say it was?
