## About

This indicator is the percentage of acute care patients who reported that the quality of the food was excellent, very good or good.

#### Source

Hospital Acute Care Survey

### Calculations

This indicator is calculated by dividing the number of respondents who answered "good, very good or excellent" by the number of respondents who answered "poor, fair, good, very good or excellent" to the question: How would you rate the quality of the food (how it tasted, serving temperature, variety)?
