High school or less	79.5
Postsecondary	79.7

## About

This indicator is the percentage of acute care patients who reported that they always had a good communication with doctors.

## Source

Hospital Acute Care Survey

## Calculations

This indicator is calculated by taking the sum of the weighted proportions obtained for the following three indicators: AU\_CWD01\_1, AU\_CWD02\_1 and AU\_CWD03\_1. This sum of weighted proportions is then divided by the sum of the weighted number of respondents to these same three indicators. The questions to which these indicators refer are as follows: 'During this hospital stay, how often did doctors treat you with courtesy and respect?', 'During this hospital stay, how often did doctors listen carefully to you?' and 'During this hospital stay, how often did doctors explain things in a way you could understand?'. This composite score calculation methodology is the same as the one used by the Canadian Institute for Health Information (CIHI).
