**About**

This indicator is the percentage of acute care patients who reported that doctors, nurses or other hospital staff talked with them about whether they would have the help they needed after leaving the hospital.

**Source**

Hospital Acute Care Survey

**Calculations**

This indicator is based on respondents who went directly to their home or to someone else's home after their hospital stay. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: During this hospital stay, did doctors, nurses or other hospital staff talk with you about whether you would have the help you needed when you left the hospital?
