## About

This indicator is the percentage of acute care patients who reported that when they left the hospital, they had a completely better understanding of their condition than when they entered the hospital.

## Source

Hospital Acute Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "completely" by the number of respondents who answered "not at all, partly, quite a bit or completely" to the question: When you left the hospital, did you have a better understanding of your condition than when you entered?
