About

This indicator is the percentage of acute care patients with a preference for English who reported that they always received services in their preferred language.

Source

Hospital Acute Care Survey

Calculations

This indicator is based on respondents who prefer to receive services in English. This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, sometimes, usually or always" to the question: During this hospital stay, how often did you receive services in your preferred language?

Unit	Interpretation	NBHC code
