## About

This indicator is the percentage of acute care patients who reported that they needed to have a family member or a friend stay with them during their hospital stay to feel safe.

## Source

Hospital Acute Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Did you feel that you needed to have a family member or a friend stay with you during your hospital stay for you to feel safe?
