## About

This indicator is the percentage of acute care patients who reported that a family member or a friend felt they needed to stay with them during their hospital stay for them to feel safe.

## Source

Hospital Acute Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Did a family member or friend feel that they needed to stay with you during your hospital stay for you to feel safe?
