## About

This indicator is the percentage of students in grades K to 5 who usually sleep 9 hours or more on school nights, as reported by a parent or guardian. This indicator is based on the Canadian 24 Hour Movement Guidelines for Children and Youth.

## Source

Student Wellness and Education Survey, Grades 4-5

## Calculations

This indicator is calculated by dividing the number of respondents who slept 8 hours or more by the number of respondents who answered the questions about bedtime and waking time. This indicator is obtained after having calculated the total number of hours slept, by subtracting the bedtime from the waking time, as self-reported by the students to the following two questions: At what time do you usually go to sleep when you have school the next morning? And when do you usually wake up on school mornings?

## Notes

This indicator has replaced: SA\_SLE01\_1.
