Technical Document

ABOUT THE NEW BRUNSWICK HEALTH COUNCIL:

New Brunswickers have a right to be aware of the decisions being made, to be part of the decision making process, and to be aware of the outcomes and cost of the health system.

The New Brunswick Health Council will foster this transparency, engagement, and accountability by engaging citizens in a meaningful dialogue, measuring, monitoring, and evaluating population health and health service quality, informing citizens on health system's performance and recommending improvements to health system partners.

 - L: Specific Indicator Sources
- M: Thank You

APPENDIX A – Creation of Communities

The NBHC has divided the province in 28 communities (with the three biggest urban cores subdivided) to ensure a better perspective of the many regional and local differences.

Together, each community contributes directly to the health regions (zones) as established by the Regional Health Authorities Act (See Section A of the Act on the next page).

The actual catchment area of health care centres, community health centres and hospital was used to determine the geographical areas to be included for each community. Census Subdivisions (CSD) were then merged together to match these catchment areas. The communities were further validated with various community members to ensure communities of interest were respected from all areas of New Brunswick.

No communities were created with less than 5,000 people (as of Census 2011) to ensure data availability, stability and anonymity for the various indicators.

The geographic dataset of the New Brunswick Health Council Community Boundaries and the health zones can be downloaded free on [GEONB](#).

New Brunswick Health Council utilizes the NBHC Community Boundaries as the basis for the work and analysis done at the community level.

NB Zones

NB Census Subdivisions

NB Communities

APPENDIX A

Section A

The health regions (zones) established under section 15 of the *Regional Health Act* are as follows:

(a) Vitalité Health Region

- (i) Kent County, excluding the portion of the village of Rogersville lying in Kent County; Albert County; Westmorland County; the community of Rogersville-east lying in Northumberland County;
- (ii) Madawaska County; the parishes of Drummond and Grand Falls in Victoria County, but excluding the portion of the parish of Drummond lying south-east of Salmon River; the parishes of Grimmer and Saint-Quentin in Restigouche County;
- (iii) Restigouche County, excluding the parishes of Grimmer and Saint-Quentin; the portion of the village of Belledune lying in Gloucester County;
- (iv) Gloucester County, excluding the portion of the village of Belledune lying in Gloucester County;

(b) Horizon Health Region B

- (i) Kent County, excluding the portion of the village of Rogersville lying in Kent County; Albert County; Westmorland County; the community of Rogersville-east lying in Northumberland County;
- (ii) Charlotte County; Saint John County; Kings County; the parishes of Petersville, Hampstead, Wickham, Brunswick and Johnston in Queens County, but excluding the portion of the Village of Cambridge Narrows lying in the parish of Johnston;
- (iii) Queens County, excluding the parishes of Petersville, Hampstead, Wickham, Brunswick and Johnston, but including that portion of the Village of Cambridge Narrows lying in the parish of Johnston; Victoria County, excluding the parishes of Drummond and Grand Falls, but including the portion of the parish of Drummond lying south-east of Salmon River; Carleton County; York County; Sunbury County; the parishes of Ludlow and Blissfield in Northumberland County;
- (iv) Northumberland County, excluding the parishes of Ludlow and Blissfield and the portion of the community of Rogersville-east lying in Northumberland County; the portion of the village of Rogersville lying in Kent County.

2002, c.R-5.05, Schedule A; 2004-17; 2008, c.7, s.15; 2011, c.55, s.1.

APPENDIX B – Cities, towns and villages included in the 33 New Brunswick communities*In order of assigned community number (1 to 28)*

City/town/village				
1 Grimmer	4 Allardville	5 Janeville	6 Pokemouche	8 Brantville
1 Kedgwick	4 Bathurst	5 Maisonnnette	6 Sainte-Cécile	8 Elsipogtog First Nation
1 Kedgwick River	4 Beresford	5 New Bandon (Gloucester County)	6 Sainte-Marie-Saint-Raphaël	8 Caissie Road
1 Saint-Quentin	4 Big River	5 Notre-Dame-des-Érables	6 Sainte Rose	8 Fairisle
2 Addington	4 Dunlop	5 Paquetville	6 Savoie Landing	8 Haut-Rivière-du-Portage
2 Atholville	4 Laplante	5 Pokeshaw	6 Shippagan	8 Lagacéville
2 Campbellton	4 Madran	5 Rang-Saint-Georges	6 Six Roads	8 Lavillette
2 Eldon	4 Nicholas Denys	5 Saint-Léolin	7 Canton des Basques	8 Neguac
2 Glencoe	4 Nigadoo	5 Saint-Simon	7 Haut-Sheila	8 New Jersey
2 Glenlevit	4 North Tetagouche	5 Stonehaven	7 Leech	8 Oak Point
2 Robinsonville	4 Pabineau First Nation	6 Cap-Bateau	7 Losier Settlement	8 Rivière-du-Portage
2 Saint-Arthur	4 Petit-Rocher	6 Chiasson Office	7 Petit Tracadie	8 Tabusintac
2 Squaw Cap	4 Pointe-Verte	6 Evangeline	7 Pointe à Tom	8 Village-Saint-Laurent
2 Tide Head	4 Robertville	6 Haut-Lamèque	7 Pointe des Robichaud	9 Big Hole Tract First Nation
2 Val-d'Amour	4 Saint-Laurent	6 Haut-Shippagan	7 Pont Lafrance	9 Baie-Sainte-Anne
3 Balmoral	4 Saint-Sauveur	6 Inkerman	7 Pont Landry	9 Bay du Vin
3 Belledune	4 Sainte-Anne (Gloucester County)	6 Inkerman Ferry	7 Rivière à la Truite	9 Black River Bridge
3 Charlo	4 Sainte-Thérèse Sud	6 Lamèque	7 Saint-Irénée	9 Blackville
3 Colborne	4 Salmon Beach	6 Landry Office	7 Saint-Isidore	9 Chaplin Island Road
3 Dalhousie	4 South Tetagouche	6 Le Goulet	7 Saint-Pons	9 Collette
3 Durham	4 Tremblay	6 Maltempec	7 Saumarez	9 Eel Ground
3 Dundee	5 Anse-Bleue	6 Miscou	7 Tracadie Beach	9 Hardwicke
3 Eel River Bar First Nation	5 Bas-Caraquet	6 Petit-Shippagan	7 Tracadie Beach	9 Miramichi
3 Eel River Crossing	5 Bertrand	6 Petite-Lamèque	7 Saumarez	9 Napan
3 Indian Ranch	5 Canobie	6 Petite-Rivière-de l'Île	7 Tracadie-Sheila	9 Nelson
3 Lorne	5 Caraquet	6 Pigeon Hill	7 Val-Comeau	9 Metepenagiag First Nation
3 McLeods	5 Clifton	6 Pointe-Alexandre	8 Alnwick	9 Northesk
3 Point La Nim	5 Grande-Anse	6 Pointe-Canot	8 Barryville	9 Renous

APPENDIX B – Cities, towns and villages included in the 33 New Brunswick communities*In order of assigned community number (1 to 28)*

City/town/village				
9 Rogersville	10 Richibucto	12 Cormier-Village	13 Melrose	15 Germantown
9 Rosaireville	10 Rochibucto First Nation	12 Dundas	13 Midgic	15 Harvey
9 South Esk	10 Saint-Anne-de-Kent	12 Grand-Barachois	13 Murray Corner	15 Hillsborough
9 Sunny Corner	10 Saint-Charles	12 Grande-Digue	13 Point de Bute	15 Hopewell
9 Trout Brook	10 Saint-Édouard-de-Kent	12 Haute-Aboujagane	13 Port Elgin	15 Little River (Albert County)

APPENDIX E – Name of communities, in order of assigned community number (1 to 28)

Cities, towns and villages included in the 28 New Brunswick communities (with the three biggest urban cores subdivided)

Explanation of a Community Name:

Community names have been assigned by looking at the population of each city, town or village in each NBHC Community from Statistics Canada's 2011 Census.

The **Abbreviated Name** is the shortest name possible. It is the name of the Census Subdivision (CSD) with the largest population in a particular community during the 2011 Census.

The **Short Name** includes the *Abbreviated Name* and the word **AREA** when a community includes more than 1 CSD.

The **Extended Name** includes the *Short Name* with a second CSD, when applicable.

Priority for the second/third CSD to be included in the name of each community is as followed:

1. Based on CSD type (City, Town, Village, Rural Community and then Parish). CSDs are classified according to designations adopted by provincial, territorial or federal authorities (i.e., a town name was chosen over a village name).
2. Based on population (i.e., when looking at 2 CSDs which are the same type—village, for example—the CSD with the largest population was chosen).

The **Full Profile Name** includes up to 3 CSDs and follows the prioritisation explained above.

The use of the word **AREA** in the *Short Name*, the *Extended Name* and the *Full Profile Name* means that there are other CSDs included in this community then those mentioned.

Community Name

APPENDIX E – Name of communities, in order of assigned community number (1 to 28)

Cities, towns and villages included in the 28 New Brunswick communities (with the three biggest urban cores subdivided)

	ABBREVIATED NAME	SHORT NAME	EXTENDED NAME	FULL PROFILE NAME
1	Kedgwick	Kedgwick Area	Kedgwick, Saint-Quentin Area	Kedgwick, Saint-Quentin and Grimmer
2	Campbellton	Campbellton Area	Campbellton, Atholville Area	Campbellton, Atholville, Tide Head Area
3	Dalhousie	Dalhousie Area	Dalhousie, Balmoral Area	Dalhousie, Balmoral, Belledune Area
4	Bathurst	Bathurst Area	Bathurst, Beresford Area	Bathurst, Beresford, Petit-Rocher Area
5	Caraquet	Caraquet Area	Caraquet, Paquetville Area	Caraquet, Paquetville, Bertrand Area
6	Shippagan	Shippagan Area	Shippagan, Lamèque Area	Shippagan, Lamèque, Inkerman Area
7	Tracadie-Sheila	Tracadie-Sheila Area	Tracadie-Sheila, Saumarez Area	Tracadie-Sheila, Saumarez and Saint-Isidore
8	Neguac	Neguac Area	Neguac, Alnwick Area	Neguac, Alnwick, Eskenoopeditj Area
9	Miramichi	Miramichi Area	Miramichi, Rogersville Area	Miramichi, Rogersville, Blackville Area
10	Bouctouche	Bouctouche Area	Bouctouche, Richibucto Area	Bouctouche, Richibucto, Saint-Louis de Kent Area
11	Salisbury	Salisbury Area	Salisbury, Petitcodiac Area	Salisbury, Petitcodiac, Harcourt Area
12	Shediac	Shediac Area	Shediac, Saint-Antoine Area	Shediac, Saint-Antoine, Beaubassin East Area
13	Sackville	Sackville Area	Sackville, Dorchester Area	Sackville, Dorchester, Port Elgin Area
14.1	Riverview	Riverview Area	Riverview and Coverdale	Riverview and Coverdale
14.2	Moncton	Moncton	Moncton	Moncton
14.3	Dieppe	Dieppe Area	Dieppe and Memramcook	Dieppe and Memramcook
15	Hillsborough	Hillsborough Area	Hillsborough, Riverside-Albert Area	Hillsborough, Riverside-Albert, Alma Area
16	Sussex	Sussex Area	Sussex, Norton Area	Sussex, Norton, Sussex Corner Area
17	Minto	Minto Area	Minto, Chipman Area	Minto, Chipman, Cambridge-Narrows Area
18.1	Saint John	Saint John Area	Saint John, Simonds Area	Saint John, Simonds and Musquash
18.2	Grand Bay-Westfield	Grand Bay-Westfield Area	Grand Bay-Westfield, Westfield Area	Grand Bay-Westfield, Westfield, Greenwich Area
18.3	Quispamsis	Quispamsis Area	Quispamsis, Rothesay Area	Quispamsis, Rothesay, Hampton Area
19	St. George	St. George Area	St. George, Grand Manan Area	St. George, Grand Manan, Blacks Harbour Area
20	St. Stephen	St. Stephen Area	St. Stephen, Saint Andrews Area	St. Stephen, Saint Andrews, Campobello Island Area
21	Oromocto	Oromocto Area	Oromocto, Gagetown Area	Oromocto, Gagetown, Fredericton Junction Area
22.1	Fredericton	Fredericton	Fredericton	Fredericton
22.2	New Maryland	New Maryland Area	New Maryland, Kingsclear Area	New Maryland, Kingsclear, Lincoln Area
23	Nackawic	Nackawic Area	Nackawic, McAdam Area	Nackawic, McAdam, Canterbury Area
24	Douglas	Douglas Area	Douglas, Saint Marys Area	Douglas, Saint Marys, Doaktown Area
25	Florenceville-Bristol	Florenceville-Bristol Area	Florenceville-Bristol, Woodstock Area	Florenceville-Bristol, Woodstock, Wakefield Area
26	Perth-Andover	Perth-Andover Area	Perth-Andover, Plaster Rock Area	Perth-Andover, Plaster Rock, Tobique Area
27	Grand Falls	Grand Falls Area	Grand Falls, Saint-Léonard Area	Grand Falls, Saint-Léonard, Drummond Area
28	Edmundston	Edmundston Area	Edmundston, Rivière-Verte Area	Edmundston, Rivière-Verte, Lac Baker Area

APPENDIX F - Zones with assigned community number (1 to 28) and community name

ZONE	COMMUNITY	COMMUNITY	FULL PROFILE NAME
1	Moncton and South-East Area	10	Bouctouche, Richibucto, Saint-Louis de Kent Area
1	Moncton and South-East Area	11	Salisbury, Petitcodiac, Harcourt Area
1	Moncton and South-East Area	12	Shediac, Saint-Antoine, Beaubassin East Area
1	Moncton and South-East Area	13	Sackville, Dorchester, Port Elgin Area
1	Moncton and South-East Area	14.1	Riverview and Coverdale
1	Moncton and South-East Area	14.2	Moncton
1	Moncton and South-East Area	14.3	Dieppe and Memramcook
1	Moncton and South-East Area	15	Hillsborough, Riverside-Albert, Alma Area
2	Fundy Shore and Saint John Area	16	Sussex, Norton, Sussex Corner Area
2	Fundy Shore and Saint John Area	18.1	Saint John, Simonds and Musquash
2	Fundy Shore and Saint John Area	18.2	Grand Bay-Westfield, Westfield, Greenwich Area
2	Fundy Shore and Saint John Area	18.3	Quispamsis, Rothesay, Hampton Area
2	Fundy Shore and Saint John Area	19	St. George, Grand Manan, Blacks Harbour Area
2	Fundy Shore and Saint John Area	20	St. Stephen, Saint Andrews, Campobello Island
3	Fredericton and River Valley Area	17	Minto, Chipman, Cambridge-Narrows Area
3	Fredericton and River Valley Area	21	Oromocto, Gagetown, Fredericton Junction Area
3	Fredericton and River Valley Area	22.1	Fredericton
3	Fredericton and River Valley Area	22.2	New Maryland, Kingsclear, Lincoln Area
3	Fredericton and River Valley Area	23	Nackawic, McAdam, Canterbury Area
3	Fredericton and River Valley Area	24	Douglas, Saint Marys, Doaktown Area
3	Fredericton and River Valley Area	25	Florenceville-Bristol, Woodstock, Wakefield Area
3	Fredericton and River Valley Area	26	Perth-Andover, Plaster Rock, Tobique Area
4	Madawaska and North-West Area	27	Grand Falls, Saint-Léonard, Drummond Area
4	Madawaska and North-West Area	28	Edmundston, Rivière-Verte, Lac Baker Area
4	Madawaska and North-West Area	1	Kedgwick, Saint-Quentin and Grimmer
5	Restigouche Area	2	Campbellton, Atholville, Tide Head Area
5	Restigouche Area	3	Dalhousie, Balmoral, Belledune Area
6	Bathurst and Acadian Peninsula	4	Bathurst, Beresford, Petit-Rocher Area
6	Bathurst and Acadian Peninsula	5	Caraquet, Paquetville, Bertrand Area
6	Bathurst and Acadian Peninsula	6	Shippagan, Lamèque, Inkerman Area
6	Bathurst and Acadian Peninsula	7	Tracadie-Sheila, Saumarez and Saint-Isidore
7	Miramichi Area	8	Neguac, Alnwick, Esgenopetitj Area
7	Miramichi Area	9	Miramichi, Rogersville, Blackville Area

NB Zones

APPENDIX G - Peer Group (with assigned community number (1 to 28) and community name)

Explanation of Peer Groups:

The New Brunswick Health Council developed 'Peer Groups' for each of the communities. A peer group consists of communities with similar census subdivision type and population size. In defining the peer groups, data from the 2011 Census of Population was used.

Peer groups are useful in the analysis of communities, where important differences may be detected by comparing a community with another community within a peer group.

Four Peer groups were created:

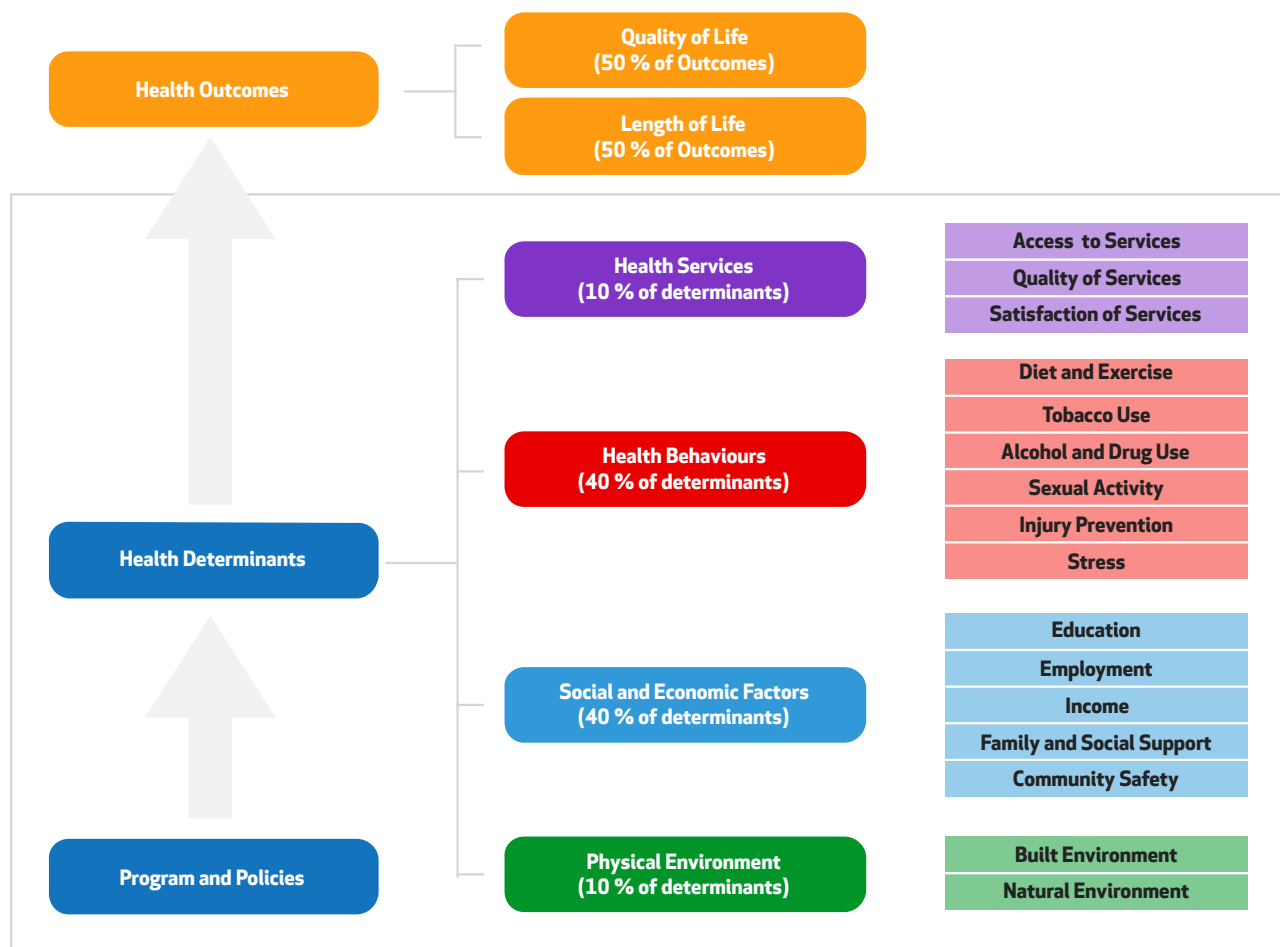

Peer Group A	Peer Group B	Peer Group C	Peer Group D
14.2 Moncton	2 Campbellton , Atholville, Tide Head Area	3 Dalhousie , Balmoral, Belledune Area	1 Kedgwick , Saint-Quentin and Grimmer
18.1 Saint John , Simonds and Musquash	4 Bathurst , Beresford, Petit-Rocher Area	5 Caraquet , Paquetville, Bertrand Area	8 Neguac , Alnwick, Esgenooetitj Area
22.1 Fredericton	9 Miramichi , Rogersville, Blackville Area	6 Shippagan , Lamèque, Inkerman Area	11 Salisbury , Petitcodiac, Harcourt Area
	14.1 Riverview and Coverdale	7 Tracadie-Sheila , Saumarez and Saint-Isidore	15 Hillsborough , Riverside-Albert, Alma Area
	14.3 Dieppe and Memramcook	10 Bouctouche , Richibucto, Saint-Louis de Kent Area	17 Minto , Chipman, Cambridge-Narrows Area
	18.2 Grand Bay-Westfield , Westfield, Greenwich Area	12 Shediac , Saint-Antoine, Beaubassin East Area	24 Douglas , Saint Marys, Doaktown Area
	18.3 Quispamsis , Rothesay, Hampton Area	13 Sackville , Dorchester, Port Elgin Area	26 Perth-Andover , Plaster Rock, Tobique Area
	22.2 New Maryland , Kingsclear, Lincoln Area	16 Sussex , Norton, Sussex Corner Area	
	28 Edmundston , Rivière-Verte, Lac Baker Area	19 St. George , Grand Manan, Blacks Harbour Area	
		20 St. Stephen , Saint Andrews, Campobello Island Area	
		21 Oromocto , Gagetown, Fredericton Junction Area	
		23 Nackawic , McAdam, Canterbury Area	
		25 Florenceville-Bristol , Woodstock, Wakefield Area	
		27 Grand Falls , Saint-Léonard, Drummond Area	

APPENDIX H – Population Health Model

The model we have chosen to represent Population Health in New Brunswick has been adapted from various population health models such as the *University of Wisconsin Population Health Institute – Wisconsin County Health Rankings* and was modified to fit our needs. We have also kept a Canadian perspective by taking into account the determinants of health as indicated by the *Public Health Agency of Canada*.

Based upon review of the literature and expert opinions on how these determinants contribute to health and by how much, we are using the following model as a guide for what influences our health.

This model regroups determinants of health that can be influenced by programs and policies. It also takes into account citizen involvement in their own health and well-being as well as external factors which can influence the health of the population.

APPENDIX I – Indicator Choice

The choice of quantitative data for the profiles is based on the following specifications:

- **Follow the NBHC Population Health Model** – Our model uses determinants of health that can be influenced by programs and policies. Indicators need to support the information in one of our sections (Health Behaviours, Social and Economic Factors, Physical Environment, Health Care, Health Outcome) or help provide contextual information about the community. Individual indicators are not as strong of an indicator, but when looking at them together, they paint a very distinct picture of population health.
- **Reliable data and source** – The information has to be from a known data source and be subject to some verification/ validation. Administrative databases are used when possible (i.e., NB Cancer Registry).
- **Reproducible information** – The profiles for each community will be updated every 3 years.
- **Availability at the community level (when possible)** – The main goal of the profiles is to provide community level information about the people who live, work and take part in activities in New Brunswick.

In some instances, community information was required to be suppressed where either it might be possible to identify a person (i.e., some individual indicators do not have a large enough sample size to report data for that indicator) or the numbers are too unreliable to be published. In other instances, zone or provincial information was the only data available.

Multiple year data was used for some indicators (i.e., all indicators from the Canadian Community Health Survey are from a 3 year average) to ensure appropriate sample size for most communities.

APPENDIX J – Data Limitations

Each community profile regroups a variety of indicators that is collected and synthesized by the New Brunswick Health Council from a variety of sources. These data sources are being used to represent the health of the population in each community, each with various levels of reliability and limitations.

Type of information:

- Information used from administrative databases (i.e. Vital Statistics, Government of New Brunswick) usually undergoes rigorous validation and was provided to us from the owners of those databases at no cost.
- Information used from any census questionnaires (i.e. Census, Statistics Canada) has given equal opportunity for all to respond. This information was provided to us at no cost from the data owner’s website or from our own in-house surveys.
- Information used from volunteer surveys (i.e. National Household Survey from Statistics Canada) each have their own methodology, target audience, and sample sizes. One limitation with these surveys are due to their voluntary nature, those not responding are not represented. It is well accepted that some marginalized groups (including the poor, immigrants, aboriginals, the less educated and mobile students) are least likely to volunteer information, which means their status can be under-represented. We acknowledge that responding to any survey is voluntary, and can be subject to the perspective of the respondent.

Together, the administrative, census and volunteer survey information help paint a clearer picture about our individual communities.

Small sample size of data:

- Data for these communities has been merged together to ensure proper data representation. This had to be done due to the small sample size of specific surveys in these areas.

DATA SOURCE	AGE RANGE	COMMUNITIES AFFECTED
Canadian Community Health Survey, Statistics Canada	All	Community 11 - Salisbury Area Community 15 - Hillsborough Area Data has been combined to ensure proper representation. These communities have the same information when it is from this source.
Canadian Community Health Survey, Statistics Canada	All	Community 17 - Minto Area Community 22.2 - New Maryland Area Data has been combined to ensure proper representation. These communities have the same information when it is from this source.

APPENDIX J – Data Limitations

Data is suppressed in some cases:

- Data is suppressed in situations where it might be possible to either identify a person (i.e., not enough survey respondents) or the numbers are too unreliable to be published. This can happen for one indicator in a specific community.

Data is not available at the community level:

- For a variety of reasons, the following data sources are not available at the community level for the 2017 My Community at a Glance reports. They are available at the health zone or provincial level only.

DATA SOURCE	AGE RANGE	INDICATOR NAME
Statistics Canada, Demography Division	All	Dependency ratio (number of dependents for every 100 people in the working age population)
Statistics Canada, Demography Division	under 20	Youth, under 20 years, as a proportion of total population
Statistics Canada, Demography Division	65+	Seniors, 65 years and over, as a proportion of total population
Statistics Canada, Canadian Community Health Survey	12+	Breastfeeding Initiation
Statistics Canada, Canadian Community Health Survey	Adults 18+	Always wear a helmet when using a bicycle
Statistics Canada, Canadian Community Health Survey	0 to 5	Food insecurity in homes with children 0 to 5 present, moderate and severe
Statistics Canada, Canadian Community Health Survey	Under 18 years old	Food insecurity in homes with children less than 18 present, moderate and severe
Statistics Canada, Households and the Environment Survey	n/a	Availability of parks/public green spaces close to home
Statistics Canada, Households and the Environment Survey	n/a	Source of energy for household heating equipment - Wood/wood pellets
Statistics Canada, Households and the Environment Survey	n/a	Source of energy for household heating equipment - Heating Oil
Statistics Canada, Households and the Environment Survey	n/a	Source of energy for household heating equipment - Electricity
Statistics Canada, Households and the Environment Survey	n/a	Source of energy for household heating equipment – natural gas
Statistics Canada, Households and the Environment survey	n/a	Households with at least one type of energy-saving light
Statistics Canada, Households and the Environment survey	n/a	Households that had a low-volume toilet
Statistics Canada, Households and the Environment survey	n/a	Households that had a low-flow shower head
Statistics Canada, Households and the Environment Survey	n/a	Households that had applied chemical pesticide

APPENDIX J – Data Limitations

DATA SOURCE	AGE RANGE	INDICATOR NAME
Statistics Canada, Households and the Environment Survey	n/a	Households that had applied chemical fertilizer
Statistics Canada, Households and the Environment survey	n/a	Purchased locally grown or produced foods (always or often)
Statistics Canada, Households and the Environment Survey	n/a	Purchased environmentally friendly or "green" cleaning products (often)
Statistics Canada, Households and the Environment Survey	n/a	Used own bags or containers to carry groceries (always or often)
Statistics Canada, Households and the Environment Survey	n/a	Household that had heard of radon
Statistics Canada, Households and the Environment Survey	n/a	Household that had not tested for radon
Statistics Canada, National Graduates Survey	Graduates	Percentage of college graduates who borrowed from government student loans programs
Statistics Canada, National Graduates Survey	Graduates	Percentage of bachelors graduates who borrowed from government student loans programs
Statistics Canada, National Graduates Survey	Graduates	Average debt at college graduation of those who borrowed
Statistics Canada, National Graduates Survey	Graduates	Average debt at bachelors graduation of those who borrowed
Statistics Canada, Canadian Vital Statistics	All	Life expectancy at birth
Statistics Canada, Canadian Vital Statistics	All – Male	Life expectancy at birth
Statistics Canada, Canadian Vital Statistics	All - Female	Life expectancy at birth
Environment Canada, Canada's Emissions Trends	n/a	Greenhouse gas emission per person
Health Canada, Cross-Canada Survey of Radon Concentrations in Homes, Final Report 2012	n/a	Raw percentage of homes tested with radon concentrations above 200 Bq/m3
Report of the Chief Electoral Officer of Canada on the 41st general election of May 2, 2011	18+	Voter Turnout - Federal Election
Government of New Brunswick, Department of Health, DAD / 3M / AHIM	Infants	Universal newborn and infant screening
Government of New Brunswick, Department of Health, Office of the Chief Medical Officer of Health	15 to 19	Sexually transmitted infections - Chlamydia rate
Government of New Brunswick, Department of Health, Office of the Chief Medical Officer of Health	All	Sexually transmitted infections - Chlamydia rate
Government of New Brunswick, Department of Health, Office of the Chief Medical Officer of Health	Kindergarten	Kindergarten children meeting immunization requirements
Government of New Brunswick, Department of Health, NB Cancer Registry	All	Breast cancer screening participation rate for women aged 50 to 69 in the last 2 years
Government of New Brunswick, ElectionsNB	18+	Voter Turnout - Provincial Election
Government of New Brunswick, Vital Statistics	15 to 19	Teen birth rate
Government of New Brunswick, Vital Statistics	Live birth	Infant with less than average birth weight (< 2,500 grams)
Government of New Brunswick, Vital Statistics	Less than 1 year	Infant deaths
Government of New Brunswick, Vital Statistics	Before age 75	Premature deaths from heart and stroke

APPENDIX J – Data Limitations

DATA SOURCE	AGE RANGE	INDICATOR NAME
Government of New Brunswick, Vital Statistics	0 to 19	Premature deaths from cancer
Government of New Brunswick, Vital Statistics	Before age 75	Premature deaths from cancer
Government of New Brunswick, Vital Statistics	Before age 75	Premature deaths from breathing diseases
Government of New Brunswick, Vital Statistics	0 to 19	Premature deaths from injuries
Government of New Brunswick, Vital Statistics	Before age 75	Premature deaths from injuries
Government of New Brunswick, Vital Statistics	0 to 19	Premature deaths due to suicides / self-inflicted injuries
Government of New Brunswick, Vital Statistics	Before age 75	Premature deaths due to suicides / self-inflicted injuries
Government of New Brunswick, Department of Health, Medicare Eligibility and Claims; Client Service Delivery System.	18 months	Children who receive the healthy toddler assessment
Government of New Brunswick, Department of Social Development	All	Average number of days to long term care home placement
Government of New Brunswick, Atlantic Lottery,	19+	Lottery sales per population 19 and up

Data Success

From zone to community information

Some of the impact of the *My Community at a Glance* document has been the demonstrated need for community information to enable better planning.

The following data was in the 2014 version of this document as zone information.

In the 2017 version, it is now available at the community level. It should be noted that Statistics Canada has calculated never previously calculated the potentially avoidable mortalities for public representation for such small communities.

DATA SOURCE	INDICATOR NAME
Government of New Brunswick, Department of Education and Early Childhood Development	Kindergarten school readiness (Anglophone and Francophone combined)
Statistics Canada, Canadian Vital Statistics, Death Database and Demography Division (population estimates), 2008-2012	Age-standardized mortality rate - potentially avoidable death - Treatable causes
Statistics Canada, Canadian Vital Statistics, Death Database and Demography Division (population estimates), 2008-2012	Age-standardized mortality rate - potentially avoidable death - Preventable causes

APPENDIX K – Data Sources

Each community profile regroups a variety of indicators that is collected and synthesized by the New Brunswick Health Council from a variety of sources.

FEDERAL DATA SOURCES:

Census, Statistics Canada

The census is the primary source of reliable demographic data in Canada. All residents of Canada are legally required to complete the census questionnaire, according to the *Statistics Act*.

Every household in Canada is included, as well as Canadians and their families who are working abroad for the federal and provincial governments, Canadian embassies or the Canadian Armed Forces.

The 2016 Census products provide statistical information about the population, age and sex, type of dwelling, families, households and marital status, language, income, immigration and ethnocultural diversity, housing, Aboriginal peoples, education, labour, journey to work, language of work and mobility and migration, as measured in the census program. At the time of the release of *My Community at a Glance 2017* (May 2017), Statistics Canada had not publicly released the 2016 data elements or geography products therefore the NBHC was not able to use the 2016 Census information in the 2017 *Community at a Glance*.

The 2011 census questionnaire, distributed to all households in Canada, included two language questions from the 2006 census long questionnaire (knowledge of official languages and languages spoken at home) along with the mother tongue question, the only language question in the 2006 short questionnaire.

The 2011 Census contained 10 questions and was conducted in May 2011. This information is used in *My Community at a Glance 2017*.

Source: <http://www12.statcan.gc.ca/census-recensement/index-eng.cfm>

National Household Survey, Statistics Canada

The National Household Survey (NHS) provides social and economic information. It is the largest voluntary survey Statistics Canada has ever conducted. The information previously collected by the long-form census questionnaire (mandatory) was collected as part of the new NHS (voluntary). This questionnaire covered most of the same topics as the 2006 Census.

In remote areas and on Indian reserves, information was gathered in face-to-face interviews. In other areas of the country, respondents were asked to complete the questionnaire online or on paper first and then follow-up was conducted by enumerators with households who had not yet responded.

The National Household Survey was conducted within four weeks of the May 2011 Census and included approximately 4.5 million households.

Participation in the survey was voluntary. Conversely, Canadians whose households were not selected in the NHS sample and who wanted to participate in the NHS could not volunteer to complete the questionnaire. The final response rate for overall New Brunswick was 63.9% (unweighted) and 74.2% (weighted).

Due to the low response rate in some census subdivision (CSD), Statistics Canada had to suppress information from the NHS for these CSD. The NBHC contracted Statistics Canada to recalculate the NHS information for the NBHC community geography (28 communities with the three biggest urban core subdivided) to ensure social and economic information could be made available for each communities.

APPENDIX K – Data Sources

Canadian Community Health Survey, Statistics Canada

The Canadian Community Health Survey (CCHS) is a cross-sectional survey that collects information related to health status, health care utilization and health determinants for the Canadian population. The CCHS operates on a two-year collection cycle. The first year of the survey cycle «.1» is a large sample, general population health survey, designed to provide reliable estimates at the health region level. The second year of the survey cycle «.2» has a smaller sample and is designed to provide provincial level results on specific focused health topics.

The CCHS covers the population 12 years of age and over living in the ten provinces and the three territories. Excluded from the survey's coverage are: persons living on reserves and other Aboriginal settlements in the provinces; full-time members of the Canadian Forces; the institutionalized population and persons living in the Quebec health regions of Région du Nunavik and Région des Terres-Cries-de-la-Baie-James. Altogether, these exclusions represent less than 3% of the target population.

Responding to this survey is voluntary. Data are collected directly from survey respondents.

Multiple year data was used to ensure appropriate sample size for most communities. This analysis was provided to the New Brunswick Health Council by the New Brunswick Department of Health who receive the CCHS database yearly.

Household and Environment Survey, Statistics Canada

The Households and the Environment Survey (HES) measures the environmental practices and behaviours of Canadian households that relate to the condition of our air, water and soils. The survey was also designed to collect data to develop and improve three key environmental indicators: air quality, water quality and greenhouse gas emissions.

The target population consisted of households in Canada, excluding households located in Yukon, Northwest Territories and Nunavut, households located on Indian reserves or Crown lands, and households consisting entirely of full-time members of the Canadian Armed Forces. Institutions and households of certain remote regions were also excluded.

This is a sample survey with a cross-sectional design. The HES sample was selected from the 2011 (January to June) respondents to the Canadian Community Health Survey (CCHS).

Responding to this survey is voluntary. Data are collected directly from survey respondents.

The 2013 version of the Households and the Environment Survey (HES) was conducted in two parts: a telephone interview, and a supplemental mail-out/mail-back survey.

Source: <http://www23.statcan.gc.ca/imdb/p2SV.pl?Function=getSurvey&Id=143524>

APPENDIX K – Data Sources

National Graduates Survey, Statistics Canada

The 2013 National Graduates Survey examines the labour market experiences of 2009/2010 graduates from public universities, community colleges and trade/vocational programs since graduation. The survey's primary objective is to obtain information on the labour market experiences of graduates entering the labour market, focusing on employment, occupations and the relationship between jobs and education.

Graduates from Canadian public postsecondary education institutions (universities, colleges, trade schools) who graduated or completed the requirements for degrees, diplomas or certificates during the reference calendar year are the targeted population for this survey. Excluded are: graduates from private postsecondary education institutions; completers of continuing-education programs (unless these led to a degree, diploma or certificate); persons who completed vocational programs lasting less than three months; persons who completed programs other than in the skilled trades (e.g. basic training and skill development); completers of provincial apprenticeship programs and those living outside of Canada or the United States at the time of the survey.

Responding to this survey is voluntary. Data are collected directly from survey respondents by telephone interview.

Source: <http://www.statcan.gc.ca/survey-enquete/business-entreprise/5012-eng.htm>

Labour Force Survey, Statistics Canada

The Labour Force Survey (LFS) provides estimates of employment and unemployment which are among the most timely and important measures of performance of the Canadian economy. With the release of the survey results only 13 days after the completion of data collection, the LFS estimates are the first of the major monthly economic data series to be released. The main objective of the LFS is to divide the working-age population into three mutually exclusive classifications - employed, unemployed, and not in the labour force - and to provide descriptive and explanatory data on each of these.

Responding to this survey is mandatory. Data are collected directly from survey respondents. Data collection for the LFS is carried out each month during the week following the LFS reference week. The reference week is normally the week containing the 15th day of the month.

Canadian Vital Statistics, Birth Database, Statistics Canada

This is an administrative survey that collects demographic information annually from all provincial and territorial vital statistics registries on all live births in Canada. Some data are also collected on live births to Canadian residents in some American states. The actual (survey) population of the Birth database is births to Canadian resident women and non-resident women in Canada, and births to Canadian resident women in some American states.

Responding to this survey is mandatory. Data are extracted from administrative files. Provincial and territorial Vital Statistics Acts (or equivalent legislation) render compulsory the registration of all live births, stillbirths, deaths and marriages within their jurisdictions.

Source: http://www23.statcan.gc.ca/imdb/p2SV.pl?Function=getSurvey&SDDS=3231&Item_Id=1627&lang=en

APPENDIX K – Data Sources

Canadian Vital Statistics, Death Database, Statistics Canada

This is an administrative survey that collects demographic and medical (cause of death) information annually from all provincial and territorial vital statistics registries on all deaths in Canada. Some data are also collected on Canadian residents who die in some American states. The cause of death variable in the death database is classified according to the World Health Organization «International Statistical Classification of Diseases and Related Health Problems» (ICD). The actual (survey) population of the Death database is deaths of Canadian residents and non-residents in Canada, and deaths of Canadian residents in some American states.

Responding to this survey is mandatory. Data are extracted from administrative files. Provincial and territorial Vital Statistics Acts (or equivalent legislation) render compulsory the registration of all live births, stillbirths, deaths and marriages within their jurisdictions.

Employment and Social Development Canada

The data contain information on major wage settlements obtained from collective agreements settled in Canada and covering 500 or more employees. Information on person-days not worked in Canada as a result of work stoppages is also available. This is an administrative database. The information was provided to us from Statistics Canada, even if this is non-Statistics Canada information.

Municipal Water and Wastewater Survey, Environment Canada

The Municipal Water and Wastewater Survey (MWWS) was a survey of all Canadian municipalities with population over 1000 and a sample of those with population under 1000 (excluding First Nations communities), which was conducted every two or three years since the early 1980s. The survey collected data on water sources, water use, water conservation, wastewater treatment level and water and wastewater pricing at the municipal level. The ongoing trend-line analyses and extensive data made available provide information that supports water management decisions in the broader context of ecosystem management.

Environment Canada has ended the Municipal Water and Wastewater Survey in 2011. The New Brunswick Health Council has chosen to utilize the information from this survey, even if it is not able to reproduce the information in future profiles. The information about the water source is the best information the NBHC could find at the community level.

APPENDIX K – Data Sources

PROVINCIAL DATA SOURCES:

A significant portion of the data in the community profiles are from provincial sources. The reliability, accessibility and variety of data available provincially are very rich in information.

The main limitation with provincial data sources is finding a national comparator. They are either not as accessible (i.e. held by the various ministries of health of the other provinces or territories) or not available (i.e. the Student Wellness Survey is not done in all provinces or territories).

Discharge Abstract Database (DAD), New Brunswick Department of Health

Originally developed in 1963, the Discharge Abstract Database (DAD) captures administrative, clinical and demographic information on hospital discharges (including deaths, sign-outs and transfers). Some provinces and territories also use the DAD to capture day surgery.

Data is received directly from acute care facilities or from their respective health/regional authority or ministry/department of health. Facilities in all provinces and territories except Quebec are required to report. Data from Quebec is submitted to CIHI directly by the ministère de la Santé et des Services sociaux du Québec. This data is appended to the DAD to create the Hospital Morbidity Database (HMDB).

Data extracted from the DAD is used to populate other CIHI databases, including

- The Hospital Morbidity Database (HMDB); and
- The Hospital Mental Health Database (MHMD).

Office of the Chief Medical Officer of Health, New Brunswick Department of Health

The Office of the Chief Medical Officer of Health has generously provided us information from their administrative databases.

NB Breast Cancer Screening and NB Medical Registry Databases New Brunswick Cancer Network, New Brunswick Department of Health

Since 1952, the surveillance of cancer in New Brunswick has been monitored through the systematic collection of patient and tumour-specific information at the NB Provincial Cancer Registry. The NB Provincial Cancer Registry is under the responsibility of NBCN.

Data collected is shared with the Canadian Cancer Registry and the North American Association of Central Cancer Registries.

Results or views expressed in the community profiles are those of the authors and not the New Brunswick Cancer Network.

APPENDIX K – Data Sources

New Brunswick Student Wellness Survey, New Brunswick Department of Social Development – Wellness Branch

The purpose of the New Brunswick Student Wellness Survey (NBSWS) is to examine students' perceptions, attitudes and behaviours in a number of key areas related to student well-being. It is a provincial initiative of the New Brunswick Department of Social Development - Wellness Branch in cooperation with the Department of Education and Early Childhood Development and the New Brunswick Health Council.

This paper survey, provided in the classroom, has been separated into two survey years - Grade 6 to 12 (2015-2016) and Kindergarten to Grade 5 (2013-2014). It has resulted in a sample of over 61,180 completed surveys.

Each survey (Grade 6 to 12 and Kindergarten to Grade 5) has a 3 year cycle.

Responding to this survey is voluntary. Data is collected directly from survey respondents by paper survey provided in the classrooms.

Source: www.nbhc.ca

Recreation Infrastructure Planning Tool (RIPT), New Brunswick Department of Tourism, Heritage and Culture, Sport and Recreation Branch

The RIPT provides access to mapped recreation facilities, demographic data, property assessment data, and spatial analysis tools to assist in the planning of the province's built recreation and sport infrastructure.

Source: <http://www.snb.ca/geonb1/e/apps/RIPT-E.asp>

Vital Statistics, Government of New Brunswick

This administrative survey collects demographic information from all live births, stillbirth, death, and marriage statistics events that occurred in the province of New Brunswick for residents and non-residents, except where specifically noted.

Responding to this survey is mandatory. Data are extracted from administrative files. Provincial and territorial Vital Statistics Acts (or equivalent legislation) render compulsory the registration of all live births, stillbirths, deaths and marriages within their jurisdictions.

New Brunswick Department of Education and Early Childhood Development

The Department of Education and Early Childhood Development has generously provided us information from their administrative databases.

New Brunswick Department of Social Development

The Department of Social Development has generously provided us information from their administrative databases.

Énergie NB Power

Énergie NB Power has generously provided us information from their administrative databases.

New Brunswick Food Security Action Network

The NBFSA Network facilitates networking among organizations and individuals related to the promotion, research, education and community engagement of food security throughout New Brunswick. With the work done by Mount Allison University's Geography and the Environment 4101 class 2010 to help create a prototype Food Atlas in cooperation with the Fundy Biosphere Reserve, the NBHC was able to create a list of all the major food stores in New Brunswick.

APPENDIX K – Data Sources

IN-HOUSE DATA SOURCES (NBHC):

Primary Care Survey, New Brunswick Health Council

This province-wide survey (2014) evaluated the quality of primary health care provided to New Brunswickers. New Brunswickers were asked about their experiences with personal family doctors, emergency departments, specialists, after hour's clinics, community health centres, nurse practitioners, ambulance services and alternative medicine practitioners. They were also asked about their use and access to primary health care.

This telephone survey was conducted with the general population of New Brunswick aged 18 years or older and has resulted in a sample of over 13,600 completed surveys.

Responding to this survey is voluntary. Data are collected directly from survey respondents selected at random by telephone interview.

Source: www.nbhc.ca

Home Care Survey, New Brunswick Health Council

This province-wide survey (2015) evaluates the quality of home care provided to New Brunswickers. New Brunswickers were asked about their experiences with several key dimensions of quality home care such as accessing and navigating services, meeting the needs of clients and their families, provider/client communication, safety, equity based on preferred language of service, and overall satisfaction with services.

This paper survey was conducted with citizens across all communities in New Brunswick who have recently received home care services, with the cost being entirely or partially covered by government. Home care includes clinical/medical services provided by health professionals and personal care services provided by home support workers. The New Brunswick Home Care Survey has resulted in a sample of 6,641 completed surveys.

Responding to this survey is voluntary. Data are collected directly from survey respondents by mailed in paper survey or a parent or guardian was asked to complete the survey on behalf of a child who may have received home care services. The home care client could ask for a caregiver to complete the survey on their behalf. Caregivers include family members, friends, neighbors and volunteers who provide unpaid care, assistance or emotional support.

34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Cancer	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Chronic pain	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Depression	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Gastric reflux (GERD)	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Heart disease	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Mood disorder other than depression	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	Yes	a	Chronic health conditions	Stroke	18 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	New	n/a	Chronic health conditions	Someone in the household has a memory problem	all	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)

APPENDIX L – Specific Indicator Sources

Page	Section of profile	Subsection of profile	Updated in 2017	Comparability	Indicator	Indicator details	Age	Gender	Unit of measure	Publication Date	Source
34	Health Outcomes	Quality of life	New	n/a	Three or more chronic health conditions		18 to 64 years old	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	New	n/a	Three or more chronic health conditions		65 years and over	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
34	Health Outcomes	Quality of life	New	n/a	Three or more chronic health conditions		all	Both	%	2014	New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2014 Survey Results (NBHC 2014)
35	Health Outcomes	Length of life	Yes	a	Infant death		Less than 1 year	Both	rate per 1,000 live birth	2012–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC
35	Health Outcomes	Length of life	No	n/a	Life expectancy at birth	Male	all	M	age	2007–2009	Statistics Canada, Cansim Table 102-4307
35	Health Outcomes	Length of life	No	n/a	Life expectancy at birth	Female	all	F	age	2007–2009	Statistics Canada, Cansim Table 102-4307
35	Health Outcomes	Length of life	No	n/a	Life expectancy at birth	Both	all	Both	age	2007–2009	Statistics Canada, Cansim Table 102-4307
35	Health Outcomes	Length of life	Yes	a	Median age of death	Male	all	M	age	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
35	Health Outcomes	Length of life	Yes	a	Median age of death	Female	all	F	age	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
35	Health Outcomes	Length of life	Yes	a	Median age of death	Both	all	Both	age	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Length of life	Yes	a	Premature deaths (0 to 19 years old years)	Cancer	0 to 19 years old	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Length of life	Yes	a	Premature deaths (0 to 19 years old years)	Injuries	0 to 19 years old	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Length of life	Yes	a	Premature deaths (0 to 19 years old years)	Suicides / self-inflicted injuries	0 to 19 years old	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014

APPENDIX L – Specific Indicator Sources

Page	Section of profile	Subsection of profile	Updated in 2017	Comparability	Indicator	Indicator details	Age	Gender	Unit of measure	Publication Date	Source
36	Health Outcomes	Lenght of life	Yes	a	Premature deaths (before age 75)	Cancer	Before age 75	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Lenght of life	Yes	a	Premature deaths (before age 75)	Injuries	Before age 75	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Lenght of life	Yes	a	Premature deaths (before age 75)	Suicides / self-inflicted injuries	Before age 75	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Lenght of life	Yes	a	Premature deaths (before age 75)	Heart and stroke	Before age 75	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Lenght of life	Yes	a	Premature deaths (before age 75)	Breathing diseases	Before age 75	Both	years of life lost, rate per 10,000 population	2010–2014	Government of New Brunswick, Vital Statistics, analysis done by the NBHC, 2010-2014
36	Health Outcomes	Lenght of life	Yes	b - currently at community level	Potentially Avoidable Mortality		all	Both	age-standardized rate per 100,000 population	2008-2012	Statistics Canada, Canadian Vital Statistics, Death Database and Demography Division (population estimates), 2008-2012
36	Health Outcomes	Lenght of life	Yes	b - currently at community level	Potentially Avoidable Mortality from Preventable Causes	Treatable causes	all	Both	age-standardized rate per 100,000 population	2008-2012	Statistics Canada, Canadian Vital Statistics, Death Database and Demography Division (population estimates), 2008-2012
36	Health Outcomes	Lenght of life	Yes	b - currently at community level	Potentially Avoidable Mortality from Treatable Causes	Preventable causes	all	Both	age-standardized rate per 100,000 population	2008-2012	Statistics Canada, Canadian Vital Statistics, Death Database and Demography Division (population estimates), 2008-2012

APPENDIX M - Thank you!

Data sharing and the good will of various organizations wanting to provide the most accurate information for each community has made these profiles what they are today.

The NBHC wishes to acknowledge the efforts of all individuals involved for their contribution to the profiles. Without their time and knowledge, these profiles wouldn't be as complete.

Thank you on behalf of the staff of the New Brunswick Health Council!
