

New Brunswick youth health varies according to their SOCIOECONOMIC STATUS

SOURCE: 2025-2026 Edition of the New Brunswick Student Wellness and Education Survey

To estimate youth socioeconomic status, the New Brunswick Health Council uses a measure comprising 6 items.

SOCIOECONOMIC STATUS HAS AN IMPACT ON YOUTH HEALTH

In red, the results are worse than NB average, and in light blue, the results are better than NB average. There is no overlap in confidence intervals, which indicates a real difference.

NOTE OF CAUTION: The data presents trends in the population. They do not define a youth, a family, or their potential.
