

New Brunswick Health Council's - 2011 Child and Youth- Rights and Well-being Framework

New Brunswick Health Council

New Brunswickers have a right to be aware of the decisions being made, to be part of the decision-making process, and to be aware of the outcomes delivered by the health system and its cost.

The New Brunswick Health Council will foster this transparency, engagement, and accountability by engaging citizens in a meaningful dialogue, measuring, monitoring, and evaluating population health and health service quality, informing citizens on the health system's performance and recommending improvements to health system partners.

-Child and Youth- Rights and Well-being Framework

The Framework

-The Framework-

Why this Framework?

The goal of this framework is to give New Brunwickers a better perspective of the well-being of New Brunswick Children and Youths through a variety of available local indicators. It will also highlight areas where we can as New Brunwickers have an influence on the future development of our children and youth by ensuring the best possible programs and policies are being used and/or developed. These children and youth are our future. Let's work together to ensure they have the best health, well-being and opportunities available to them.

What is the Framework?

The Child and Youth Rights and Well-being Framework uses indicators and measures that help reflect determinants of health and well-being. However, as simple as the concept sounds, there is no unique, universally accepted way of actually measuring child and youth well-being that emerges from the academic literature.

We have chosen to represent child and youth well-being through a 9 question framework, linked to various available indicators or measures in New Brunswick. These questions take into account outcomes, the determinants of health^A, and the performance of program and policies in place in New Brunswick that have an influence on children and youth. Health determinants are the social economic and physical environment, the personal health practices and behaviours, the individual capacity and coping skills, the human biology, Early childhood development and health services.

The Rights and well-being Framework has also been linked to the UN *Convention on the Rights of the Child*^B. Most of the Articles listed as "rights" in the *Convention* are associated with this Rights and Well-being Framework. Almost every country has agreed to these rights. "Rights" are things every child and youth should have or be able to do. All the rights are connected to each other, and all are equally important. Sometimes, we have to think about rights in terms of what is best for a children in a situation, and what is critical to life and protection of harm.

Policymakers, program managers and service providers in different sectors may be tempted to focus on the parts of the framework that address their sector most directly. However, the allocation of indicators to each part of the framework is a subjective exercise, given the interdependence of children's rights and the conditions measured by the indicators/data that affect all aspects of their well-being. Therefore, we encourage readers to consider the data across the framework in seeking to understand its implications for their work.

A Provincial View

In this framework we look at the child and youth New Brunswick population (0 to 19 years old), showing male and female averages in relation to the overall provincial average of both sexes combined. Wherever possible we have included a Canadian average so we can show where New Brunwickers stand in relation to the other Canadian provinces and territories. There will be very few indicators where comparison is possible since much of the data is being supplied by New Brunswick databases supplied by various provincial government departments.

-The Health Zones-

7 Zones View

We have created 7 frameworks one for each health zone. Each of these zones is compared, whenever possible, with each other zone for every indicator. The goal of the health zone snapshot is to provide information on specific health determinants which are highlighted as doing well (ranked 1,2), Caution (ranked 3,4,5), or lagging (ranked 6,7). The rating is done by best (1) to worst (7).

By comparing zones, some zones will always do better than others; ultimately, this can lead to encourage continuous improvement within the zone and affect the health of all New Brunswickers.

New Brunswick Health Zones

Who should use the framework :

- Community and neighborhood residents
- Young people
- Educators
- Youth workers
- Community leaders
- Employers and business people
- Healthcare providers
- Parents / Grandparents
- Media representatives
- Religious leaders
- After-school caregivers and coaches
- Community agencies
- Youth groups
- Policy and decision-makers
- Local Government representatives
- Local coalitions and networks

What are the Rights of the Child and Youth? Created by UNICEF Canada

UN Convention on the Rights of the Child In Child Friendly Language^c

"Rights" are things every child should have or be able to do. All children have the same rights. These rights are listed in the UN Convention on the Rights of the Child. Almost every country has agreed to these rights. All the rights are connected to each other, and all are equally important. Sometimes, we have to think about rights in terms of what is the best for children in a situation, and what is critical to life and protection from harm. As you grow, you have more responsibility to make choices and exercise your rights.

Article 1

Everyone under 18 has these rights.

Article 2

All children have these rights, no matter who they are, where they live, what their parents do, what language they speak, what their religion is, whether they are a boy or girl, what their culture is, whether they have a disability, whether they are rich or poor. No child should be treated unfairly on any basis.

Article 3

All adults should do what is best for you. When adults make decisions, they should think about how their decisions will affect children.

Article 4

The government has a responsibility to make sure your rights are protected. They must help your family to protect your rights and create an environment where you can grow and reach your potential.

Article 5

Your family has the responsibility to help you learn to exercise your rights, and to ensure that your rights are protected.

Article 6

You have the right to be alive.

Article 7

You have the right to a name, and this should be officially recognized by the government. You have the right to a nationality (to belong to a country).

Article 8

You have the right to an identity – an official record of who you are. No one should take this away from you.

Article 9

You have the right to live with your parent(s), unless it is bad for you. You have the right to live with a family who cares for you.

Article 10

If you live in a different country than your parents do, you have the right to be together in the same place.

Article 11

You have the right to be protected from kidnapping.

Article 12

You have the right to give your opinion, and for adults to listen and take it seriously.

Article 13

You have the right to find out things and share what you think with others, by talking, drawing, writing or in any other way unless it harms or offends other people.

Article 14

You have the right to choose your own religion and beliefs. Your parents should help you decide what is right and wrong, and what is best for you.

Article 15

You have the right to choose your own friends and join or set up groups, as long as it isn't harmful to others.

Article 16

You have the right to privacy.

Article 17

You have the right to get information that is important to your well-being, from radio, newspaper, books, computers and other sources. Adults should make sure that the information you are getting is not harmful, and help you find and understand the information you need.

Article 18

You have the right to be raised by your parent(s) if possible.

Article 19

You have the right to be protected from being hurt and mistreated, in body or mind.

Article 20

You have the right to special care and help if you cannot live with your parents.

Article 21

You have the right to care and protection if you are adopted or in foster care.

Article 22

You have the right to special protection and help if you are a refugee (if you have been forced to leave your home and live in another country), as well as all the rights in this Convention.

Article 23

You have the right to special education and care if you have a disability, as well as all the rights in this Convention, so that you can live a full life.

Article 24

You have the right to the best health care possible, safe water to drink, nutritious food, a clean and safe environment, and information to help you stay well.

Article 25

If you live in care or in other situations away from home, you have the right to have these living arrangements looked at regularly to see if they are the most appropriate.

Article 26

You have the right to help from the government if you are poor or in need.

Article 27

You have the right to food, clothing, a safe place to live and to have your basic needs met. You should not be disadvantaged so that you can't do many of the things other kids can do.

Article 28

You have the right to a good quality education. You should be encouraged to go to school to the highest level you can.

Article 29

Your education should help you use and develop your talents and

abilities. It should also help you learn to live peacefully, protect the environment and respect other people.

Article 30

You have the right to practice your own culture, language and religion - or any you choose. Minority and indigenous groups need special protection of this right.

Article 31

You have the right to play and rest.

Article 32

You have the right to protection from work that harms you, and is bad for your health and education. If you work, you have the right to be safe and paid fairly.

Article 33

You have the right to protection from harmful drugs and from the drug trade.

Article 34

You have the right to be free from sexual abuse.

Article 35

No one is allowed to kidnap or sell you.

Article 36

You have the right to protection from any kind of exploitation (being taken advantage of).

Article 37

No one is allowed to punish you in a cruel or harmful way.

Article 38

You have the right to protection and freedom from war. Children under 15 cannot be forced to go into the army or take part in war.

Article 39

You have the right to help if you've been hurt, neglected or badly treated.

Article 40

You have the right to legal help and fair treatment in the justice system that respects your rights.

Article 41

If the laws of your country provide better protection of your rights than the articles in this Convention, those laws should apply.

Article 42

You have the right to know your rights! Adults should know about these rights and help you learn about them, too.

Articles 43 to 54

These articles explain how governments and international organizations like UNICEF will work to ensure children are protected with their rights.

This is not an official version of the *Convention on the Rights of the Child*. The official *Convention* can be found online at: <http://www2.ohchr.org/english/law/crc.htm>
