

# Vaping and N.B. youth: WHAT ARE THE FACTS?

## Vaping is on the rise

Number of N.B. students who have ever tried vaping

## It contributes to an increase in cigarette smoking

Students who smoke daily or occasionally

## NICOTINE & THC

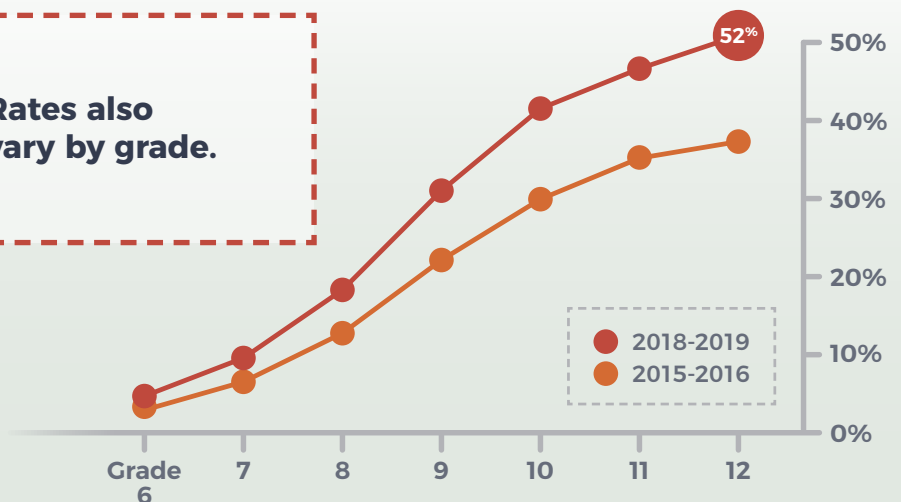

Many vaping liquids contain nicotine or THC, creating the possibility of addiction or other conditions.

“Vaping is not safe for young people or pregnant women. I remind all New Brunswickers that vaping is not without risk and that the potential long-term effects of vaping remain unknown.”

- Dr. Jennifer Russell  
NEW BRUNSWICK CHIEF MEDICAL OFFICER

Among grade 12 students, 1 in 2 has tried it.

Rates also vary by grade.

\* All numbers in this infographic are estimates based on more than 39,000 responses from grade 6 to 12 students from the New Brunswick Student Wellness Survey
